## NUMBERS 1–4

## RECENT CRUSTAL MOVEMENTS IN EUROPE

***Proceedings of the IAG Regional Symposium***

| | | |
|---|---|---|
| I. Joó | v | Introduction |
| I. Joó | vii | Resolutions of the Regional CRCM Symposium on recent crustal movements in Europe |
| T. Tanaka and M. Ohba | 1 | Crustal movement research and GPS in Japan |
| R. Deniz, A. Aksoy, D. Yalin, H. Seeger, P. Franke, O. Hirsch and P. Bautsch | 13 | Determination of crustal movements in Turkey by terrestrial geodetic methods |
| H. L. Szöcs and Cs. Hujber | 23 | Some problems of the correlation analysis especially in geodesy |
| S. V. Enman and A. A. Nikonov | 33 | A comparative analysis of maps of vertical crustal movements for European Russia |
| A. Beinat, R. Jäger, H. Kutterer C. Marchesini and G. Schmitt | 43 | Monitoring horizontal motions in a local network at Caneva in Friuli, Italy |
| A. Beinat, R. Jäger, C. Marchesini and G. Schmitt | 59 | Interim report on a regional RCM-network in Friuli, Italy |
| I. Joó | 71 | The horizontal gradients of the recent vertical movements in the Carpatho-Balkan region |
| Davaadorjin Monhor | 85 | Preliminary report on an approach to testing for normality |
| K. Czarnecki | 91 | GPS positioning as applied to investigation of recent crustal movements |
| K. Czarnecka | 101 | Local aspects, models and monitoring of recent crustal movements in central Europe |
| K. Atzbacher and C. Gerstenecker | 107 | Secular gravity variations: recent crustal movements or scale factor changes? |
| Florijan Vodopivec, Dušan Kogoj and Bojan Stopar | 123 | The use of GPS in the fourth epoch measurements of crustal movements along the Ljubljana fault |
| I. Joó and H. Szöcs | 135 | The investigation of a presumed connection of recent vertical movements with geological characteristics by multivariate correlation analysis |

Contents

| | | |
|---|---|---|
| I. Fejes, T. Borza, I. Busics and A. Kenyeres | 145 | Realization of the Hungarian geodynamic GPS reference network |
| M. I. Yurkina | 153 | Some reference problems in vertical crustal movement studies |
| I. Joó and Vy Quoc Hai | 159 | Deduction of the horizontal gradients of the Hungarian vertical movement velocities by polynomial fitting |

# AUTHOR INDEX

Aksoy A., 13
Atzbacher K., 107

Bautsch P., 13
Beinat A., 43, 59
Borza T., 145
Busics I., 145

Czarnecka K., 101
Czarnecki K., 91

Deniz R., 13

Enman S. V., 33

Fejes I., 145
Franke P., 13

Gerstenecker C., 107

Hai V. Q., 159
Hirsch O., 13
Hujber CS., 23

Jäger R., 43, 59
Joó I., v, vii, 71, 135, 159

Kenyeres A., 145
Kogoj D., 123
Kutterer H., 43

Marchesini C., 43, 59
Monhor D., 85

Nikonov A. A., 33

Ohba M., 1

Schmitt G., 43, 59
Seeger H., 13
Stopar B., 123
Szöcs H., 23, 135

Tanaka T., 1
